USDA Offers Secure New Options for Signing and Sharing Documents Online

Farmers and ranchers working with USDA's Farm Service Agency or Natural Resources Conservation Service can now sign and share documents online in just a few clicks. By using Box or OneSpan, producers can digitally complete business transactions without leaving their homes or agricultural operations. Both services are free, secure, and available for multiple FSA and NRCS programs.

Box is a secure, cloud-based site where FSA or NRCS documents can be managed and shared. Producers who choose to use Box can create a username and password to access their secure Box account, where documents can be downloaded, printed, manually signed, scanned, uploaded, and shared digitally with

Upcoming County Committee Meetings:

Hawaii County Committee March 12, 2021 at 8:30am

Honolulu County Committee February 19, 2021 at 3:00pm

Maui County Committee February 18, 2021 at 8:30 am

Kauai County Committee February 17, 2021 at 9:00am

Guam County Committee April 20, 2021 at 9:00 am

CNMI County Committee April 21, 2021 at 9:00 am

Contact the County Office to confirm meeting date and time, as budget constraints may limit the County Committee's ability to meet each month.

Click here for a list of County Offices, contact numbers and addresses: https://www.fsa.usda.gov/state-offices/Hawaii/service-centers/index

Website for Hawaii and Pacific Basin FSA: www.fsa.usda.gov/hi

Service Center staff. This service is available to any FSA or NRCS customer with access to a mobile device or computer with printer connectivity.

OneSpan is a secure eSignature solution for FSA and NRCS customers. Like Box, no software downloads or eAuthentication is required for OneSpan. Instead, producers interested in eSignature through OneSpan can confirm their identity through two-factor authentication using a verification code sent to their mobile device or a personalized question and answer. Once identity is confirmed, documents can be reviewed and e-signed through OneSpan via the producer's personal email address. Signed documents immediately become available to the appropriate Service Center staff.

Box and OneSpan are both optional services for customers interested in improved efficiency in signing and sharing documents with USDA, and they do not replace existing systems using eAuthentication for digital signature. Instead, these tools provide additional digital options for producers to use when conducting business with FSA or NRCS.

USDA Service Center staff are available to help producers get started with Box and OneSpan through a few simple steps. Please visit farmers.gov/service-locator to find your local office and let Service Center staff know you're interested in signing and sharing documents through these new features. In most cases, one quick phone call will be all that is needed to initiate the process.

Visit <u>farmers.gov/mydocs</u> to learn more about Box and OneSpan, steps for getting started, and additional resources for conducting business with USDA online.

To learn more about program flexibilities and Service Center status during the coronavirus pandemic, visit farmers.gov/coronavirus.

USDA Temporarily Suspends Debt Collections, Foreclosures and Other Activities on Farm Loans for Several Thousand Distressed Borrowers Due to Coronavirus

Due to the national public health emergency caused by coronavirus disease 2019 (COVID-19), the U.S. Department of Agriculture has announced the temporary suspension of past-due debt collections and foreclosures for distressed borrowers under the Farm Storage Facility Loan and the Direct Farm Loan programs administered by the Farm Service Agency (FSA).

USDA will temporarily suspend non-judicial foreclosures, debt offsets or wage garnishments, and referring foreclosures to the Department of Justice. USDA will work with the U.S. Attorney's Office to stop judicial foreclosures and evictions on accounts that were previously referred to the

Department of Justice. Additionally, USDA has extended deadlines for producers to respond to loan servicing actions, including loan deferral consideration for financially distressed and delinquent borrowers. In addition, for the Guaranteed Loan program, flexibilities have been made available to lenders to assist in servicing their customers.

The announcement by USDA expands previous actions undertaken by the Department to lessen financial hardship. According to USDA data, more than 12,000 borrowers—approximately 10% of all borrowers—are eligible for the relief announced today. Overall, FSA lends to more than 129,000 farmers, ranchers and producers.

The temporary suspension is in place until further notice and is expected to continue while the national COVID-19 disaster declaration is in place.

USDA's Farm Service Agency provides several different loans for producers, which fall under two main categories:

- Guaranteed loans are made and serviced by commercial lenders, such as banks, the Farm Credit System, credit unions and other non-traditional lenders. FSA guarantees the lender's loan against loss, up to 95%.
- Direct loans are made and serviced by FSA using funds from the federal government.

The most common loan types are Farm Ownership, Farm Operating and Farm Storage Facility Loans, with Microloans for each:

- Farm Ownership: Helps producers purchase or enlarge a farm or ranch, construct a new or improve an existing farm or ranch building, pay closing costs and pay for soil and water conservation and protection.
- Farm Operating: Helps producers purchase livestock and equipment and pay for minor real estate repairs and annual operating expenses.
- Farm Storage Facility Loans are made directly to producers for the construction of cold or dry storage and includes handling equipment and mobile storage such as refrigerated trucks.
- Microloans: Direct Farm Ownership, Operating Loans and Farm Storage Facility Loans have a shortened application process and reduced paperwork designed to meet the needs of smaller, non-traditional and niche-type operations.

Contact FSA

FSA encourages producers to contact their county office to discuss these programs and temporary changes to farm loan deadlines and the loan servicing options available. For Service Center contact information, visit farmers.gov/coronavirus. For servicing information, access farmers.gov.

USDA Offers New Forest Management Incentive for Conservation Reserve Program

The U.S. Department of Agriculture (USDA) is making available \$12 million to forest landowners enrolled in the Conservation Reserve Program (CRP) who want to implement healthy forest management practices. Producers can now signup for the Forest Management Incentive (FMI), which provides incentives to landowners with land in CRP to encourage proper tree thinning and other practices.

Right now, less than 10% of land currently enrolled in CRP is dedicated to forestland. But these nearly 2 million acres of CRP forestland, if properly managed, can have enormous benefits for natural resources by reducing soil erosion, protecting water quality, increasing water quantity and diversifying local farm operations and rural economies.

Only landowners and agricultural producers with active CRP contracts involving forest cover can enroll. This does not include active CRP contracts that expire within two years. Existing CRP participants interested in tree thinning and prescribed burning must comply with the standards and specifications established in their CRP contract.

CRP participants receive the incentive payment once tree thinning and other authorized forest management practices are completed.

The incentive payment is the lower of these two options:

- The actual cost of completing the practice; or
- 75% of the payment rate offered by USDA's Natural Resources Conservation Service (NRCS), if the practice is offered through NRCS conservation programs.

More on CRP

Signed into law in 1985, CRP is one of the largest private-lands conservation programs in the United States. It was originally intended primarily to control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production. The program has evolved over the years, providing many conservation and economic benefits. The program marks its 35-year anniversary this month. Program successes include:

- Preventing more than 9 billion tons of soil from eroding, which is enough soil to fill 600 million dump trucks.
- Reducing nitrogen and phosphorous runoff relative to annually tilled cropland by 95% and 85%, respectively.
- Sequestering an annual average of 49 million tons of greenhouse gases, equal to taking 9 million cars off the road.
- Creating more than 3 million acres of restored wetlands while protecting more than 175,000 stream miles with riparian forest and grass buffers, which is enough to go around the world seven times.
- Benefiting bees and other pollinators and increasing populations of ducks, pheasants, turkey, bobwhite quail, prairie chickens, grasshopper sparrows and many other birds.

More Information

CRP signup began on January 19, 2021. FSA will announce deadline later this year. Interested producers should contact their <u>local FSA county office</u>.

All USDA Service Centers are open for business, including some that are open to visitors to conduct business in person by appointment only. All Service Center visitors wishing to conduct business with the FSA, NRCS, or any other Service Center agency should call ahead and schedule an appointment. Service Centers that are open for appointments will pre-screen visitors based on health concerns or recent travel, and visitors must adhere to social distancing guidelines. Visitors are required to wear a face covering during their appointment. Field work will continue with appropriate social distancing. Our program delivery staff will be in the office, and they will be working with our producers in office, by phone, and using online tools. More information can be found at farmers.gov/coronavirus.

Change to Policy on Filing a Notice of Loss for Grazed Forage Producers with NAP Coverage

For the 2021 and subsequent crop years, NAP forage producers with the intended use of grazing who elect to use independent assessments or other approved alternative loss percentage methods to establish their loss are no longer required to file a CCC-576 Notice of Loss with FSA. However, a

CCC-576 Application for Payment form must be submitted to FSA no later than 60 calendar days after the coverage period ends.

Producers that elect to have the grazing loss determined using similar mechanically harvested units still must timely file a CCC-576 Notice of Loss within 15 days of the disaster event or damage to the crop first becomes apparent or within 15 days of harvest.

USDA Extends General Signup for Conservation Reserve Program

The U.S. Department of Agriculture (USDA) is extending the <u>Conservation Reserve Program</u> (CRP) General Signup period, which had previously been announced as ending on Feb. 12, 2021. USDA will continue to accept offers as it takes this opportunity for the incoming Administration to evaluate ways to increase enrollment. Under the previous Administration, incentives and rental payment rates were reduced resulting in an enrollment shortfall of over 4 million acres. The program, administered by USDA's Farm Service Agency (FSA), provides annual rental payments for 10 to 15 years for land devoted to conservation purposes, as well as other types of payments.

Before the General CRP signup period ends, producers will have the opportunity to adjust or resubmit their offers to take advantage of planned improvements to the program.

As one of the largest private-lands conservation programs in the United States, CRP provides both economic and conservation benefits by taking land out of agricultural production. Program successes include:

- Sequestering in soils and plants over 12 million metric tons of carbon dioxide equivalent (CO₂e), or about the same amount that the entire state of Delaware emits annually.
- Preventing more than 2 billion tons of soil from being blown away by wind erosion over the life of currently enrolled acres.
- Reducing phosphorous reaching streams by almost 85 million pounds, nitrogen by nearly
 450 million pounds, and sediment by over 160 million tons in 2020 alone.
- Creating more than 2.3 million acres of restored wetlands while protecting more than 177,000 stream miles with riparian forest and grass buffers, enough to go around the world seven times.
- Establishing over a half million acres of dedicated pollinator habitat and nearly 15 million more acres of diverse plantings that provide forage for pollinators.
- Increasing populations of ducks and other game birds, prairie chickens, and such grassland songbirds as Baird's Sparrow. CRP in the Northern Great Plains supports an estimated 8.6% of the grassland bird population.
- Increasing habitat that supports economic opportunities, such as job creation, related to hunting and fishing activities.

This signup for CRP gives producers an opportunity to enroll land for the first time or re-enroll land under existing contracts that will be expiring Sept. 30, 2021. All interested producers, including those on Indian reservations and with trust lands, are encouraged to contact their local USDA Service Center for more information.

All USDA Service Centers are open for business, including those that restrict in-person visits or require appointments. All Service Center visitors wishing to conduct business with FSA, Natural Resources Conservation Service, or any other Service Center agency should call ahead and schedule an appointment. Service Centers that are open for appointments will pre-screen visitors based on health concerns or recent travel, and visitors must adhere to social distancing guidelines. Visitors are also required to wear a face covering during their appointment. Our program delivery staff will continue to work with our producers by phone, email, and using online tools. More information can be found at farmers.gov/coronavirus.

February 2021 Interest Rates

Farm Operating Loans 1.375%
Farm Ownership Loans 2.625%
Farm Ownership Loans Direct Down Payment for Beginning Farmer or Rancher 1.500%
Emergency Loans 2.375%

Dates to Remember

February 15, 2021 - Acreage reporting deadline for perennial forage and hemp

March 5, 2021 - Deadline to submit nomination packet for Advisory Committee on Urban Agriculture

March 15, 2021 - Acreage reporting deadline for coffee

<u>March 31, 2021</u> - Acreage reporting deadline the subsequent year for crops covered by the Non-Insured Crops Disaster Assistance Program, fruits and vegetables. Contact your county office for a full list of applicable crops.
